The Greatest Invention of the Age! PERFECT PROTECTION FROM THE ELEMENTS. PATENT GALVANIC CEMENT THE subscriber is new prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had scientific neu experimenting, and that it has been the study of Architects and Buildiers for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the people wish. The contraction, expansion and rusting of metal roofs, are so great in changeable climates, that

plied to their buildings, that his Cement is the cheapest a d best aricle ever before known. The combination of this Cement is such, that it is calculated for entire new roofs, flat or steep; covering ever old shingles without removing them; liming earse troughs, seeming around buttlements, chimneys and sky lights. Covering car tops, steamer decks, &c. This Cement, by its non-conduction and galvinism, prevents metal roofs from rusting and underseddering, and resists the extremes of heat and cold, better than snything ever invented, for entire roofs or for covering metal and the out-side of wood buildings, making them fire proof. Its appearance is like state; beautiful for the rich palace or the humble cottage.

The undersigned having secured the right to the State of Tennessee, will sell rights of Territory, by Counties or

rocation. He may be found at his office on the west side of Main street, seath of Union, (Canovan's Building,) No. 326, unless absent on professional business.
